

# PUBLIC WIFI

To connect to the Windjammer Public Wi-Fi Network -

Select one of the **WJPUBLICWIFI** networks that appear on your Wi-Fi connection list. Choose the one with the better signal for your best reliability and speed. Once you have made your selection to that WCA network access point, you will automatically be redirected to the Windjammer Public Access Login Page. You will then need to enter your **Username** (or Web ID) and **Password**. (this information can be found on your WCA Resident ID card) and then you will be granted an internet connection on our communities Wi-Fi Network accordingly.

## LOGIN PAGE:

## RESIDENT ID CARD:

## \*\*Disclaimer\*\*

While the WCA Network has been historically very reliable you should never rely on our network for your work product, emergency 911 calls or any other critical task and understand that our network is maintained by our staff along with other 3rd parties technical services providers as is necessary and that this network is subject to outages that can happen from time to time due to equipment failures, lightning or storm damages, etc. all of which may and can require such technical repairs of which can require having to order replacement parts that take time to get in and become fixed; and in some cases parts can come from as far away as China as we try to stay as cost efficient as possible in such regards hence why we guarantee NO SERVICE LEVEL AGREEMENT OF YOUR NETWORK UPTIME.

Note that our WiFi network is primarily used to network our security cameras and this means that our security system gets priority over all bandwidth traffic on this network which translates that every Windjammer resident whom is using this network at any given time shares the resident available bandwidth equally which means available bandwidth acts sort of like a rubber band so to speak in that the more people that are on the network then the thinner your bandwidth becomes. So the bottom line is that if you want to make sure you have certain internet speeds and uptime connectivity guaranteed by a SLA - Service level agreement it is recommended that you contract services with anyone of the (3) commercial providers for these services such as: Spectrum, Frontier and WOW whom are Internet carriers available to you here at Windjammer that you can subscribe with for a monthly service fee according to your needs and budget.
